CARLSBAD PEACHES BRINGING GOOD RETURNS

Plans Are Made to Increase Orchards on Extensive Scale

Carlsbad, N. M., Aug. 17.—Returns from the big peach orchard shipments continue to come in from New York, Pittsburgh and Chicago commission houses.

The last two cars sent out brought over \$1,700 each, in New York, where the produce is selling the highest. They were Elbertas and Superbs, and topped the market, the boxes selling wholesale for \$1.70 to \$1.80 in open market.

In all 24 cars have been shipped from less than 50 acres of orchard, besides a local market amounting to nearly \$50 per acre.

The phenomenal returns have started a great wave of interest in peaches, and the Carlsbad commercial club directors met and considered a scheme of planting the tract of land north and east of town, comprising nearly 200 acres to peaches. F. G. Tracy, the manager of the orchard in La Huerta, which has 50 acres in full bearing, and 50 more that will come in next year, plans to organize a holding company which will plant the trees after buying the land on time. The first crop, it is believed, will pay all expenses of planting and the second will begin to pay for the land. The orchard is in full bearing would have a gross income of over \$100,000 per year.

The support of local capitalists who have watched the peach crop for the last two years will be enlisted in the securing of the capital.

CANTALOUPE ARE GOING TO WASTE

Fire on Graham Destroys Underbrush Before It Is Extinguished

Safford, Ariz., Aug. 17.—Hundreds of crates of cantaloupes are being lost here daily since the carload shipments ceased, as the vines are producing better melons and more than in July, but the prices on the eastern market do not justify gathering the crop to compete with their local.

A fire on Mt. Graham destroyed several acres of underbrush and some timber before it was extinguished.

The musical given by the pupils of Prof. Bond at Brier's hall was thoroughly enjoyed. The playing of David Holguin on the violin was a feature. He is a young artist and leaves shortly for Europe, where he will continue his musical education.

BLOYCE FARM NEAR FT. DAVIS IS SOLD

Fort Davis, Texas, Aug. 17.—Bloyce Brothers have sold their farm consisting of 236 acres, and the new owner, Mr. Johnson, will move to the farm with his family as soon as repairs are made on the house. This farm is two miles and a half east of Fort Davis.

H. G. Burd had a fine lot of water melons on the market Saturday, some weighing 50 pounds. They were raised on his farm four miles from town.

TO PART WITH HIS FINE MARE. Sergt. W. F. Soporatos, of the fourth cavalry, and his beautiful saddle mare will soon be parted. The first sergeant and his big mare have been striking figures on the streets of El Paso ever since the Fourth came here on border patrol duty. Now that they are going to Clondroft to camp, the sergeant has arranged to sell his blooded mount, as it will be difficult for him to take an extra horse with him.

"This New FREE Hair Remover Is Surely A Marvel!"

Electro-In, Only Hair Remover That Completely Destroys Hair Forever. Sent FREE.

"I used Electro-In a Year Ago. The Hair Has Never Come Back. It's A Marvel!"

Electro-In is the only hair remover now known that does not burn, irritate or harm the skin, no matter how long it is left on.

It does not matter whether your skin is as tender as a baby's, or whether the hair growth is extremely thick and heavy or is as light as down. Electro-In destroys it forever in a few minutes. It gets right into the hair roots, and kills them permanently. You've tried other hair-removers. Probably your hair came back. Not so with Electro-In.

Electro-In is certain, safe and quick. To prove it we will send you a liberal trial bottle of Electro-In if you will send the coupon below filled out together with a 3c stamp to pay postage. This is enough to give it a thorough test. The regular sized bottle is \$1.00 and hair-removers will be refunded if Electro-In does not do all we claim. Just fill out trial coupon below and mail with a two-cent stamp today.

FREE TREATMENT. Fill in your name and address on dotted lines below and send it to Ko-Rec-Tiv Co., 5316 So. State St., Chicago, enclosing a two-cent stamp to help cover mailing, and we will send at once a free trial bottle that will show what Electro-In will do for you. F7525.

CAMPAIGN AGAINST ALL SUSPICIOUS HOUSES

Officials to Make Thorough Investigation of Rooming Houses

Rooming houses are to be investigated by the city and county officials, both on the north and south sides of the tracks, in an effort to prevent violations of the law. Criminal prosecution will follow wherever sufficient evidence can be obtained, the county attorney says, and as soon as the chief of detectives obtains sufficient proof against a number of questionable resorts, complaints will be filed against the proprietors in the county court.

The arrest of the two young Mexican girls in a rooming house on Stanton street has aroused the officers to the necessity of keeping a close watch on resorts of this character.

TAFT SETTLES THANKSGIVING DAY

Banks Want It on 23d, Theatrical Men on 30th, Five Thursdays

New York, N. Y., Aug. 17.—A question that has been agitating for some time both the local and traveling theatrical managers throughout the country is said to have been settled to their satisfaction by president Taft deciding on Nov. 30 as Thanksgiving day.

All theatrical managers have figured on this date, the last Thursday of November, being Thanksgiving day, and have signed their contracts, cut their terms for the holiday, and ordered their printing accordingly. But the trouble came in the fact that the holiday this year normally falls on the fifth Thursday and the last day of the month, which makes it bad for the bankers, as the last three days of the month are the busiest of the national banks, which are compelled by the law to render their statements on the first of each month to the treasury department. And it being optional with the president to fix the holiday for the fourth Thursday of November if he so elects, and that being the Thursday on which the holiday has hitherto been held, it would seem but normal that the president would grant the bankers' request, made some time ago, and change the date to the 23d.

All the important booking agencies in New York City are booking the holiday as November 30, and have nearly all contracted for their Thanksgiving attractions for that date. As the Thanksgiving holiday is the most profitable national holiday in the year, the importance of a final settlement of the question was obvious.

TO EXTEND EXPRESS DELIVERY LIMITS

Express free delivery limits will soon be extended to the city limits. At present free delivery does not reach to all of the west end and stops toward the east less than half way to the boundary. Arrangements are now being made by the Wells-Fargo company to make deliveries throughout the city without extra fee. It is expected the service will be started about September 1.

EVERYONE CAN HAVE Beautiful Hair.

Having a head of nice hair is a blessing within the reach of anyone who will use Newbro's Hairpic before the dandruff germ has denuded the scalp and left a condition of chronic baldness.

Hairpic imparts that snap and luster to the hair which is so attractive. Having a subtle fragrance, Hairpic appeals directly to persons of refinement. It has been sold for years, and boasts of more satisfied users than all other hair dressings combined.

Newbro's Hairpic is recommended and used by the best barbers and hair dressers.

Send 10c in postage or silver for sample and booklet to The Hairpic Co., Dept. R., Detroit, Mich.

Work on all bottles are guaranteed by all druggists.

Baby's Voice

Every woman's heart responds to the charm and sweetness of a baby's voice, because nature intended her for motherhood. But even the loving nature of a mother shrinks from the ordeal because such a time is regarded as a period of suffering and danger. Women who use Mother's Friend are saved much discomfort and suffering, and their systems, being thoroughly prepared by this great remedy, are in a healthy condition to meet the time with the least possible suffering and danger. Mother's Friend is recommended only for the relief and comfort of expectant mothers; it is in no sense a remedy for various ills, but its many years of success, and the thousands of endorsements received from women who have used it are a guarantee of the benefit to be derived from its use. This remedy does not accomplish wonders but simply assists nature to perfect its work. Mother's Friend allays nausea, prevents caking of the breasts, and in every way contributes to strong, healthy motherhood. Mother's Friend is sold at drug stores. Write for our free book for expectant mothers.

MAYOR AND OTHERS PLAN A LAND DEAL

A real estate deal is pending by which mayor C. E. Kelly, J. M. Wyatt and others will obtain possession of a strip of 100 acres along the river front south of Washington park and Orchard park, which the old Rio Grande left high and dry when it made its last cut and moved into Mexico several hundred yards.

The property belongs to the Leahy estate, including Florence F. Dwyer, William French, Julia O'Keefe, Benjamin Leahy and others.

The price offered for the land is reported to be \$150 per acre and the deal will probably be closed this week. It will be necessary to protect the land by means of levees from encroachments of the river during the high water periods.

RUHL MAKES SMALL RANCH PAY A GOOD PROFIT

Mesilla Valley Farmers Try Diversified Farming, With Good Results

Las Cruces, N. M., Aug. 17.—L. E. Ruhl has finished selling the last of 450 pounds of tomatoes grown on his 10 acre ranch north of town and reports more coming on although he has marketed over \$25 worth at 6 cents per pound from the small bed of tomatoes which he planted between the pear trees.

With about 800 young pear trees growing into money makers, Mr. Ruhl has decided to practice diversified farming on the land between the trees. The tomato crop is one of his products. He has also sold 150 dozen roasting ears at 15 cents per dozen, has about 60 bushels of fine seed wheat that the firm of Thompson-Forster has contracted for, and the corn crop from five acres will average over 50 bushels to the acre as fine seed corn as can be found in the country.

In addition to the above the tract has produced over four tons of water-melons, 100 crates of cantaloupes and small quantities of the various garden produce required by the family. The ten acre tract is large enough if a man used every acre of the ten.

P. Martinez, of Chamberlain, was here with a number of the largest beets ever grown in the valley. The two samples measure over a foot long and weigh 23 pounds, the larger one being 12 pounds and the smaller one 11 pounds.

These beets were grown in the valley south of town on the old Oliver ranch and Mr. Martinez said that he had others which were larger than the ones shown. The beets grew so fast that they grew out of the ground and had to be banked up with dirt.

TWO CARLOADS OF HONEY FROM VALLEY

Many Valley Ranchers Find Bee Raising Profitable Industry

Valencia, Texas, Aug. 17.—The lower valley, along with its other industries, is becoming famous for the quantity and quality of the honey produced at several ranches by farmers interested in bee culture.

Carl Stahman, who has one of the most extensive apiaries in the valley, recently shipped two carloads of honey to an eastern market. Each car contained 11 tons of honey. This honey, which is gold in color, was produced from alfalfa blossoms and on account of its delicious flavor and beautiful color will bring an extra good price in the market.

SHIP HAY TO ALPINE.

Valentine, Texas, Aug. 17.—A. S. Stewart and John Beaumgart shipped two cars of hay to Alpine. This hay was grown on Stewart's ranch, six miles from Valentine.

PLOW NOW, IS AN EXPERT'S ADVICE

Says It Kills the Weeds and Does Much Good in Many Ways

"Plow now" is the advice of H. M. Balmer, agricultural expert for the Santa Fe railroad at Amarillo, Texas.

"If we expect to profit by our past experience, we are going to better our farm conditions by plowing earlier, deeper and on a larger scale." He continues: "To plow doesn't mean to work the surface soil from two to four inches deep with a disk harrow. The disk harrow is one of our best farm implements, but it is very much abused on many of our farms, by being required to replace the plow in addition to doing its own work. One of our farmers recently made the statement: 'I am now putting in my eighth crop without the use of a plow.' His crops show the result.

"Shallow work is very favorable to weed growth, every seed comes up and none is placed too deep to germinate. Shallow tillage and weed taken from the surface usually found on the same farm.

"From the appearance of many of our fields it seems that we have forgotten about the weeds. Regardless of the recent rains, many of our fields are getting too dry to plow well. Weeds take more moisture than our crops. Very little of our stubble land has been disked and the result is we have lots of weeds and very little chance for saving our moisture.

"Why plow now? To kill weeds, to make plant food available and save the moisture. At the same time this early plowing will have time to get settled before planting time and will be in condition to hold late moisture. We must remember that our soils do not lack in fertility but rather it is a question of moisture. Our hardest work should be to till our land so that it can properly receive and hold this moisture.

"All early plowing should be packed immediately. If a subsurface packer cannot be obtained the work can be done very satisfactorily as follows:

"Drag or harrow immediately after the plow, then run the disk harrow over it with disks set straight and harrow again after the disk. Watch this plowed ground very closely, later, don't let grass or weeds get started and be sure that crabs are not allowed to form.

"Wheat ground, especially, should be prepared as outlined, it should be plowed deep and be well soaked. The more of this that can be done for wheat between now and August 20 the better. We should be sure to get our wheat ground prepared first and then follow this with other fall plowing."

HEAVY SHIPMENTS OF PEACHES MADE

Cotton Crop in Lower Pecos Valley Is Large and Promises Well

Carlsbad, N. M., Aug. 17.—The warm weather of the past few days has caused little cessation in the gathering and marketing of the peach crop in this section of the valley this season. About 50 car loads of choice Elberta peaches have been shipped from this point already and while this particular variety is running low it is being closely followed with other varieties in rapid succession.

The majority of these peaches are shipped from the large orchards owned by McLenathan and Tracy. These growers have successfully demonstrated the value of thorough cultivation and irrigation. Last winter they introduced smudge pots into this section of the valley and their value has been practically demonstrated. Their use will be general next season.

The alfalfa seed crop is now being harvested and gives promise of an abundant yield. Threshers are busy in every section of the valley and from this crop alone many thousands of dollars will be realized by the growers.

The thousands of acres of cotton which were planted in the lower Pecos valley this spring are now in full bloom and hold out flattering promise to the planter. With the present favorable conditions continuing throughout the season another one of the chief assets of this section will be demonstrated by its prompt place in the markets of the world.

INSECT DESTROYS ALTO POTATO CROP

Alto, N. M., Aug. 17.—Alto is now having the warmest weather it has ever experienced and crops are suffering from the heat and dryness. A number of farmers here are losing their potatoes from an insect that infests the roots and completely destroys the vine. D. J. Cox has lost \$500 worth of potatoes already.

BIG LAGUNA RANCH IS LEASED FOR \$100,000

Vegetable Gardens of Chinese at Torreon Are Repeatedly Looted

Torreón, Mexico, Aug. 17.—An important transaction was made public this week whereby Julio Lujan rented the Sacramento hacienda, including its immense cotton plantations, to Jose Cueto, for \$100,000 per year. Mr. Lujan is closing up his offices in Torreón. Mr. Cueto was formerly a partner in the ownership of the Venecia ranch in Sacramento.

The Venecia and annexes was this week rented to J. F. Brittingham of Gomez Palacio by its owner, Cristobal Martinez. The consideration is not made public.

Chinese Gardens Looted. The abuses against the Chinese did not end with the bloody massacre of May 15 but continue in a less horrifying degree but in a greatly annoying fashion. Repeated raids are made on the local Chinese gardens by people of the lower classes, who take with them carloads which they fill at their pleasure with the choicest vegetables grown in the gardens.

If the Chinaman on guard shows any curiosity in the matter he finds himself looking down the barrel of a pistol or some other weapon. For this reason many Chinese have refused to work and the gardens are being rapidly depleted of those vegetables which were planted earlier. This will doubtless produce a vegetable famine and the Chinese stalls, which have been the pride of the market, will have little to offer.

ALFALFA SEED CROP IS BEING THRESHED

Barstow, Texas, Aug. 17.—The alfalfa seed crop is rapidly being threshed. The yield is good and is bringing good prices. Two threshers have been busy for the past week. Probably they will get through by the last of August. They are about 40 farmers.

The Barstow Irrigation company is now ready to turn water in the canal and the farmers will soon be irrigating again.

W. H. Lee lost by fire about 100 tons of seed alfalfa hay, due to the carelessness on the part of a Mexican and a cigar.

Work on the cement curb on Main street has begun.

D. T. Johnson & son bought this week 80 acres of land under the Barstow Irrigation system.

ALFALFA GROWS AN INCH EVERY DAY

Willcox, Ariz., Aug. 17.—A newly made farm near Willcox that is making a record, is that of F. M. Harris. 500 acres are planted to alfalfa, one half put in three weeks ago and the other half two weeks ago. The three week's crop is now 24 inches high and is a splendid stand. This shows a growth of something more than an inch per day.

One acre is put in of sunflower seed for chicken feed and it promises more grain for this purpose than any other crop.

BUYS LAND FOR \$1000, REFUSES \$5000 FOR IT.

Deming, N. M., Aug. 17.—Sam Schwing, a mile and a half east of town, has just installed a new No. 5 Krach pump and a 25 horsepower motor. He has increased his alfalfa area considerably this season, and will soon have his entire 40 acres set to this profitable crop. This property was sold three years ago for \$1000 and later was held at \$1200, \$1500 and finally at \$1800 at which figure it was sold. Improved with a pumping plant, crops put in, and the owner since refusing \$5,000 for the same property.

BUYS WELL AND WILL IRRIGATE 100 ACRES OF LAND
